

CSA6501
Generative AI

Unit 2

Lab Programs

(01 – 05)

Y. Jayesh Ranjan

192472201

1. Aim

To design Zero-shot, One-shot, and Few-shot prompts to generate a product description for a Smart Fitness Watch.

Algorithm

1. Import the Hugging Face pipeline.
2. Load a text generation model.
3. Create Zero-shot, One-shot, and Few-shot prompts.
4. Generate responses.
5. Compare the outputs.

Code

```
from transformers import pipeline
```

```
generator = pipeline(
    "text-generation",
    model="gpt2"
)
```

```
# Zero-shot Prompt
```

```
zero_prompt = "Write a product description for a Smart Fitness Watch."
```

```
print("ZERO-SHOT")
```

```
print(generator(zero_prompt, max_length=80)[0]["generated_text"])
```

```
print("-" * 60)
```

```
# One-shot Prompt
```

```
one_prompt = """
```

```
Example
```

```
Product: Wireless Earbuds
```

```
Description:
```

```
Wireless Earbuds provide high-quality sound, Bluetooth connectivity and long battery life.
```

```
Now write a product description for a Smart Fitness Watch.
```

```
"""
```

```
print("ONE-SHOT")
```

```
print(generator(one_prompt, max_length=150)[0]["generated_text"])
```

```
print("-" * 60)
```

Few-shot Prompt

few_prompt = ""

Example 1

Product: Bluetooth Speaker

Description:

Portable Bluetooth speaker with powerful sound and long battery life.

Example 2

Product: Wireless Mouse

Description:

Wireless mouse with ergonomic design and adjustable DPI.

Now write a product description for a Smart Fitness Watch.

""

```
print("FEW-SHOT")
```

```
print(generator(few_prompt, max_length=200)[0]["generated_text"])
```

Input

Zero-shot Prompt

Write a product description for a Smart Fitness Watch.

One-shot Prompt

Example:

Wireless Earbuds...

Few-shot Prompt

Bluetooth Speaker...

Wireless Mouse...

Output:

```
140/140 [00:00<00:00, 3040.0it/s]
ZERO-SHOT
[transformers] Passing 'generation_config' together with generation-related arguments=({'max_length'}) is deprecated and will be removed in future versions. Please pass either a 'generation_config' object OR all generation parameters explicitly, but not both.
[transformers] Both 'max_new_tokens' (=256) and 'max_length' (=80) seem to have been set. 'max_new_tokens' will take precedence. Please refer to the documentation for more information. (https://huggingface.co/docs/transformers/main/en/main_classes/text_generation)
[transformers] Ignoring clean_up_tokenization_spaces=True for BPE tokenizer GPT2Tokenizer. The clean_up_tokenization post-processing step is designed for WordPiece tokenizers and is destructive for BPE (it strips spaces before punctuation). Set clean_up_tokenization_spaces=False to suppress this warning, or set clean_up_tokenization_spaces_for_bpe_even_though_it_will_corrupt_output=True to force cleanup anyway.
Write a product description for a Smart Fitness Watch.

Note: If you are a fitness or fitness-related company, please check your supplier's terms and conditions before using this product. All products are listed in their supplier's website.

You must be logged in to use this product.
-----
Product: Wireless Earbuds
Description:
Wireless Earbuds provide high-quality sound, Bluetooth connectivity and long battery life.

Now write a product description for a Smart Fitness Watch.
How does it work?
You write the app with a simple code that sets up your smartwatch via Bluetooth. After you sign in, you can follow along with the code on the watch.
Why do you need to use this code?
This is a great example of how to use the code. If you want to use it in a more specialized way, you can use a different method.
Why does it need a name?
Because Bluetooth and smartwatches are two very different devices. They are both very different devices.
When you create a new smartwatch, it will ask you for a name. You can do it again in a few minutes.
When you create the app, it will ask you for a phone number. You can do it in minutes.
When you add or delete an app, you will get a notification for it.
How can you write a smartwatch without using a phone number?
I'm using the smartwatch for writing my fitness tracker.
How do I use this code to read an article?
-----
FEW-SHOT
[transformers] Both 'max_new_tokens' (=256) and 'max_length' (=200) seem to have been set. 'max_new_tokens' will take precedence. Please refer to the documentation for more information. (https://huggingface.co/docs/transformers/main/en/main_classes/text_generation)

Example 1
Product: Bluetooth Speaker

Description:
Portable Bluetooth speaker with powerful sound and long battery life.

Example 2
Product: Wireless Mouse

Description:
Wireless mouse with ergonomic design and adjustable DPI.

Now write a product description for a Smart Fitness Watch.

Example 3
Product: Bluetooth Speaker

Description:
Portable Bluetooth speaker with powerful sound and long battery life.

Sample, write a product description for a Smart Fitness Watch.

Example 4
Product: Bluetooth Speaker
```

Result

Thus, Zero-shot, One-shot, and Few-shot prompting techniques were successfully used to generate a product description.

Aim

To design Zero-shot, One-shot, and Few-shot prompts to generate a 200-word blog on Applications of Artificial Intelligence in Healthcare.

Algorithm

1. Import the Hugging Face pipeline.
2. Load a text generation model.
3. Create Zero-shot, One-shot, and Few-shot prompts.
4. Generate blog content.
5. Compare the generated blogs.

Code

```
from transformers import pipeline
```

```
# Load GPT-2 model
```

```
generator = pipeline("text-generation", model="gpt2")
```

```
# -----
```

```
# Zero-shot Prompt
```

```
# -----
```

```
zero_prompt = """
```

```
Write a 200-word blog on Applications of Artificial Intelligence in Healthcare.
```

```
"""
```

```
print("===== ZERO-SHOT =====\n")
```

```
print(generator(zero_prompt, max_length=250)[0]["generated_text"])
```

```
print("\n" + "="*80 + "\n")
```

```
# -----
```

```
# One-shot Prompt
```

```
# -----
```

```
one_prompt = """
```

```
Example
```

Topic: Benefits of Online Education

Blog:

Online education provides students with flexible learning opportunities. It allows learners to study from anywhere while accessing quality educational resources. Technology has made learning interactive and accessible.

Now write a 200-word blog on Applications of Artificial Intelligence in Healthcare.
"""

```
print("===== ONE-SHOT =====\n")  
print(generator(one_prompt, max_length=300)[0]["generated_text"])
```

```
print("\n" + "="*80 + "\n")
```

```
# -----  
# Few-shot Prompt  
# -----  
few_prompt = """  
Example 1
```

Topic: Importance of Renewable Energy

Blog:
Renewable energy helps reduce pollution and provides sustainable power sources.

Example 2

Topic: Advantages of Cloud Computing

Blog:
Cloud computing enables users to store and access data securely over the internet.

Now write a 200-word blog on Applications of Artificial Intelligence in Healthcare.
"""

```
print("===== FEW-SHOT =====\n")  
print(generator(few_prompt, max_length=350)[0]["generated_text"])
```

Input

Zero-shot Prompt:

Write a 200-word blog on Applications of Artificial Intelligence in Healthcare.

One-shot Prompt:

Example blog about Online Education.

Few-shot Prompt:

Example blogs about Renewable Energy and Cloud Computing.

Output

[illegible]

```
===== ONE-SHOT =====

[transformers] Both 'max_new_tokens' (<256) and 'max_length' (<300) seem to have been set. 'max_new_tokens' will take precedence. Please refer to the documentation for more information. (https://huggingface.co/docs/transformers/main/en/main_classes/text_generation)

Example

Topic: Benefits of Online Education

Blog:
Online education provides students with flexible learning opportunities. It allows learners to study from anywhere while accessing quality educational resources. Technology has made learning interactive and accessible.

Now write a 200-word blog on Applications of Artificial Intelligence in Healthcare.

```

Result

Thus, Zero-shot, One-shot, and Few-shot prompting techniques were successfully used to generate a 200-word blog on Applications of Artificial Intelligence in Healthcare.

Aim

To design Zero-shot, One-shot, and Few-shot prompts to summarize an article into 50 words and compare the generated summaries based on accuracy, completeness, and readability.

Algorithm

1. Import the Hugging Face pipeline.
2. Load a text generation model.
3. Provide the article.
4. Create Zero-shot, One-shot, and Few-shot prompts.
5. Generate summaries.
6. Compare the summaries.

Code

```
from transformers import pipeline
generator = pipeline("text-generation", model="gpt2")
article = """
Artificial Intelligence is transforming many industries by improving automation,
decision-making, and problem-solving. AI is widely used in healthcare, education,
banking, transportation, and manufacturing. It helps increase efficiency,
reduce human errors, and improve productivity.
"""
```

```
zero_prompt = f"""
Summarize the following article in exactly 50 words.
```

Article:

```
{article}
"""
```

```
print("===== ZERO-SHOT =====\n")
print(generator(zero_prompt, max_length=120)[0]["generated_text"])
print("\n" + "="*80 + "\n")
one_prompt = f"""
```

Example

Article:

Python is a programming language. It is easy to learn and is widely used for web development, artificial intelligence, and data science.

Summary:

Python is an easy-to-learn programming language used in web development, artificial intelligence, and data science.

Now summarize the following article in exactly 50 words.

Article:

```
{article}
"""
```

```
print("===== ONE-SHOT =====\n")
print(generator(one_prompt, max_length=180)[0]["generated_text"])
```

```
print("\n" + "="*80 + "\n")
few_prompt = f"""
Example 1
```

Article:

Cloud computing allows users to store and access data over the internet.

Summary:

Cloud computing enables secure online data storage and easy access from anywhere.

Example 2

Article:

Renewable energy reduces pollution and supports sustainable development.

Summary:

Renewable energy provides clean power while protecting the environment.

Now summarize the following article in exactly 50 words.

Article:

```

Article:
Artificial intelligence is transforming many industries by improving automation, decision-making, and problem-solving. AI is widely used in healthcare, education, banking, transportation, and manufacturing. It helps increase efficiency, reduce human errors, and improve productivity.

The AI that has been developing is capable of enhancing the lives of millions. Our technology is capable of improving human lives.

The benefits of AI are endless. Our artificial intelligence has evolved from simple computer simulations and computer models. It is capable of developing tasks that humans can do without the help of a computer.

The problem is, it is not possible to automate that task without a human being. We must continue to optimize.

Aim

To design Zero-shot, One-shot, and Few-shot prompts to generate a professional email requesting leave due to illness and compare the generated emails based on tone, grammar, formatting, and completeness.

Algorithm

1. Import the Hugging Face pipeline.
 2. Load a text generation model.
 3. Create Zero-shot, One-shot, and Few-shot prompts.
 4. Generate professional emails.
 5. Compare the generated emails.
-

Code

```
from transformers import pipeline
generator = pipeline("text-generation", model="gpt2")
zero_prompt = """
Write a professional email requesting leave due to illness.
"""

print("===== ZERO-SHOT =====\n")
print(generator(zero_prompt, max_length=120)[0]["generated_text"])

print("\n" + "="*80 + "\n")
one_prompt = """
Example

Subject: Leave Request
Dear Manager,
I am unable to attend work today due to a family emergency. I kindly request leave for one
day.

Thank you.

Now write a professional email requesting leave due to illness.
"""

print("===== ONE-SHOT =====\n")
print(generator(one_prompt, max_length=180)[0]["generated_text"])

print("\n" + "="*80 + "\n")

few_prompt = """
Example 1
```

Subject: Sick Leave

Dear Sir,

I am feeling unwell and request one day of leave.

Thank you.

Example 2

Subject: Medical Leave

Dear Professor,

Due to illness, I am unable to attend today's classes. Kindly grant me leave.

Thank you.

Now write a professional email requesting leave due to illness.

"""

```
print("===== FEW-SHOT =====\n")  
print(generator(few_prompt, max_length=250)[0]["generated_text"])
```

Input

Zero-shot Prompt:

Write a professional email requesting leave due to illness.

One-shot Prompt:

Example of a leave request email.

Few-shot Prompt:

Two examples of leave request emails.

Output

```
Python 3.14.5 (tags/v3.14.5:1607950, May 10 2026, 10:43:50) [MSC v.1944 64 bit (AMD64)] on win32
